<ul style="list-style-type: none"> Design and enforce service contracts for drinking water Monitoring of water resources liable to be used for the production of drinking water; Regulation of concessionaires and independent operators Planning and management of investments in drinking water supply. Intervenes if the service provider cannot supply water and provides water free of charge 		<ul style="list-style-type: none"> Design and enforcement of concession contracts Licensing and supervision of service providers Monitoring of compliance with regulations, tariff setting. Planning and management of investments in sanitation. 		
Note: Legal and Institutional reform to include onsite sanitation				
The legal and institutional reforms of the WSS sector as well as the regulatory arrangements for sanitation led to increasing attention to onsite sanitation in recent years, the same regulatory actor is mandated to take responsibility for both sewered and onsite sanitation.
